Technical Working Group Meeting Announcement High-GWP Refrigerants Tracking/Reporting/Repair Program for Stationary Sources

The first public working group meeting for the high global warming potential (GWP) refrigerants tracking/reporting/repair program for stationary sources will be held on Thursday May 29, 2008 from 10:00 AM to 1:00 PM PDT, in Conference Room 550 at Cal/EPA Headquarters (address above).

The purpose of this meeting is to present preliminary options for the high-GWP tracking/reporting/repair program and solicit ideas from the working group. This program aims to minimize emissions of high-GWP refrigerants from stationary air conditioning and refrigeration equipment through leak repair, technician certification and reporting, improved recovery rates, and other approaches. For more information, please visit <http://www.arb.ca.gov/cc/reftrack/reftrack.htm>.

A conference call is set-up for those who cannot attend this meeting in person. The toll number is 1-773-799-3727, pass code is 40797, and call leader is Yachun Chow. A staff presentation will be posted on the ARB website in advance of the meeting. Transportation, parking and lodging information can be found at <http://www.arb.ca.gov/maps/sactomap.htm>.

If you have further questions, please contact Jeff Cohen at jcohen@arb.ca.gov or Yachun Chow at ychow@arb.ca.gov. We have attached a preliminary agenda to this announcement and look forward to discussing this important measure with you.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.
